Notes to Consolidated Financial Statements	4-9

These consolidated interim financial statements for Adira Energy Ltd. have been prepared in accordance with Canadian generally accepted accounting principles consistently applied. The most significant of these accounting principles are set out in the September 30, 2009 audited consolidated financial statements. Only changes in accounting information have been disclosed in these interim consolidated financial statements. These interim consolidated financial statements are presented on an accrual basis of accounting. A precise determination of many assets and liabilities is dependent upon future events and accordingly, estimates and approximations have been made using careful judgment. Management is satisfied that these interim consolidated financial statements have been fairly presented.

The auditors of Adira Energy Ltd. have not performed a review of these interim consolidated financial statements.

Notes to Consolidated Interim Financial Statements

For the six month period ended March 31, 2010

(Expressed in United States Dollars)

1. Nature of Operations, Basis of Presentation and Going Concern

AMG Oil Ltd. was incorporated on February 20, 1997 under the name Trans New Zealand Oil Company in the State of Nevada, United States of America. It changed its name to AMG Oil Ltd. (“AMG” or the “Company”) on July 27, 1998. On November 25, 2008, the Company's shareholders approved the change of its jurisdiction of incorporation from the State of Nevada to the Canadian federal jurisdiction. On September 1, 2009, AMG completed a share exchange with Adira Energy Corp. (“Adira”), an oil and gas exploration and development company incorporated under the Ontario *Business Corporations Act*, on April 8, 2009 which resulted in a reverse takeover by Adira of AMG (note 2). Adira subsequently changed its name to Adira Energy Holdings Corp.

These consolidated interim financial statements have been prepared on a going concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business. The ability of the Company to continue as a going concern depends upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete development, and upon future profitable operations from the properties or proceeds from their disposition. The Company is an exploration stage company and has not earned any revenues to date.

There can be no assurance that the Company will be able to continue to raise funds in which case the Company may be unable to meet its obligations. Should the Company be unable to continue as a going concern, the net realizable value of its assets may be materially less than amounts recorded on the consolidated balance sheet. These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary, should the Company be unable to continue as a going concern.

2. Share Exchange Agreement

On April 29, 2009, AMG entered into a letter of intent to purchase all of the issued and outstanding shares of Adira in exchange for shares of AMG. As part of the arrangement, Adira conducted a share split to increase Adira's number of issued and outstanding common shares from 22,500,000 to 31,200,000. The share exchange ratio was one common share of AMG for each issued and outstanding common share of Adira. The proposed transaction was further subject to Adira completing a private placement of a minimum of \$2,000,000 by issuance of 8,000,000 units.

Pursuant to the share exchange agreement dated September 1, 2009, AMG acquired all of the issued and outstanding common shares of Adira by issuing 39,040,001 common shares of the Company to Adira's shareholders on a one for one basis. As the shareholders of Adira obtained control of the resulting Company, the share exchange was considered to be a reverse takeover (“RTO”) transaction. Accordingly for accounting purposes Adira is the acquirer. The assets and liabilities of Adira are included at carrying value and the assets and liabilities of AMG are included at fair value.

3. Significant Accounting Policies

Basis of Presentation

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“GAAP”). The balance sheet at March 31, 2010 has been derived from the consolidated financial statements at that date but does not include all of the information and footnotes required by GAAP for annual consolidated financial statements. The interim consolidated financial statements follow the same accounting policies and methods of their application as the most recent annual consolidated financial statements.

Principles of Consolidation

These interim consolidated financial statements include the accounts of the Company and its wholly-owned legal subsidiary, Adira, and its wholly-owned integrated subsidiaries, Adira Energy Israel Ltd. and Adira Energy Israel Service Ltd., hereinafter collectively referred to as the “Company”. All intercompany account balances and transactions have been eliminated.

Oil and Gas Properties

The Company follows the successful efforts method of accounting for its exploration activities. Under the successful efforts method, acquisition costs of proved and unproved properties are capitalized. Costs of unproved properties are transferred to proved properties when proved reserves are confirmed. Exploration costs, including geological and geophysical costs, are expensed as incurred. Exploratory drilling costs are initially capitalized. If it is determined that a specific well does not contain proved reserves, the related capitalized exploratory drilling costs are charged to expense. To date all exploration costs have been charged to operations.

Development costs, which include the costs of wellhead equipment, development drilling costs and handling facilities, applicable geological and geophysical costs, and the costs of acquiring or constructing support facilities and equipment, are capitalized. Costs incurred to operate and maintain wells and equipment and to lift oil and gas to the surface will be expensed as operating costs. If and when the Company achieves production, acquisition costs of proved properties will be depleted using the unit-of-production method based on proved reserves. Capitalized exploratory drilling costs and development costs will be depleted on the basis of proved developed reserves by area. Support facilities and equipment will be depreciated on a straight-line basis over their useful lives.

Property costs by area are reviewed for impairment at least annually to consider whether there are conditions that may indicate impairment. The carrying value of each property is compared to its net recoverable amount as estimated by quantifiable evidence of the market value of similar land or geological resources. If the carrying value is found to exceed the estimated net recoverable amount, a write down will be recorded.

Future accounting changes

International Financial Reporting Standards (“IFRS”)

In February 2008, the Canadian Accounting Standards Board (“AcSB”) confirmed that GAAP for publicly accountable enterprises will be converged with IFRS effective for fiscal years beginning on or after January 1, 2011. The Company will therefore be required to report using IFRS commencing with its unaudited interim financial statements for the three months ended December 31, 2011, which must include restated interim results for the three month period ended December 31, 2010, prepared on the same basis. The conversion to IFRS will impact the Company’s accounting policies, information technology and data system, internal control over financial reporting, and disclosure controls and procedures. The Company will report under IFRS for interim and annual periods beginning January 1, 2011. Comparative information will be restated to comply with IFRS reporting requirements.

4. Oil and Gas Licenses

The Company has one onshore and two offshore licenses to explore for oil and gas in Israel. The onshore license awarded (the "Eitan License") comprises an area of approximately 31,060 acres in the Hula Valley in Northern Israel. The Eitan License was awarded in December 2008 for a term of three years, expiring in December 2011, and may be renewed upon fulfillment of certain conditions for a further four year period. The Eitan License was awarded prior to the incorporation of the Company. The license was awarded to a Company controlled by certain Directors of the Company and subsequent to the incorporation of Adira Energy Israel, was transferred to the Company.

The first offshore license awarded (the "Gabriella License") comprises an area of approximately 97,000 acres. The Gabriella License was awarded to the Company in July 2009 for a term of three years, expiring July, 2012 and may be renewed upon fulfillment of certain conditions for a further four year period. The second offshore license awarded (the "Yitzhak License") comprises an area of approximately 31,555 acres. The Yitzhak License is effective until October 2012 and may be renewed upon fulfillment of certain conditions for a further four year period. The Yitzhak License is directly to the north of and contiguous to the Company's Gabriella License.

In January 2010 the Company's wholly owned subsidiary Adira Energy Israel Ltd. ("Adira Israel") signed an agreement with Modiin Energy Limited Partnership ("MELP") and Modiin Energy General Partners ("MEGP") (collectively "Modiin") to facilitate the full initial funding of the Gabriella offshore license. Under the terms of the agreement, MELP can farm in up to 70% (of 100%) (the "Modiin Earn-In Rights") of certain rights of participation in the Gabriella License. As part of the agreement, the general partner of MEGP will invest a total of US\$ 300,000 for the purchase by way of a private placement of 600,000 Subscription Receipts to purchase shares of the Company (the "Subscription Receipts") at a price of US\$ 0.50 each. The Subscription Receipts will be exchanged automatically without any further consideration for 600,000 common shares in the capital of the Company ("Common Shares") on the date upon which the Common Shares will be listed for trading on a recognized stock exchange in Canada. The funds received will be held in escrow subject to certain conditions and certain approvals being obtained.

The revenues generated from the licenses are subject to 12.5% royalty payable to the government of Israel.

5. Related Party Transactions

During the six month period ended March 31, 2010, the Company incurred the following with related parties:

- \$124,000 in consulting fees to individuals that are directors and officers of the Company or to private companies which are controlled by a director or officer of the Company (three month period ended December 31, 2009 \$83,500);
- \$110,960 in technical consulting fees to officers of the Company or corporations controlled by an officer (three month period ended December 31, 2009 \$40,600).

The above transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

March 31, 2010	62,640,001	\$3,478,894

- (c) Stock Option Plan

The Company has a stock option plan whereby options may be granted to eligible directors, officers and employees, provided that the number of shares issued under the plan does not exceed 10% of issued and outstanding common shares of the Company. Stock options may be issued at a term and exercise price to be determined by the Company's board of directors provided that the exercise price is no less than the market price at the date of the grant.

The Company has four categories of stock options that have different vesting periods:

- (i) Type A stock options vest over 2 years, with 12.5% vesting each quarter with the initial amount vesting on the date three months after the grant date.
- (ii) Type B stock options vest 8.5% at the end of each quarter for the first two years and 8% at the end of each quarter thereafter. The initial amount will vest three months after the grant date.
- (iii) Type C stock options vest over 4 years, with 6.25% vesting at the end of each quarter with the initial amount vesting on the date three months after the grant date.
- (iv) Type D stock options vest at 12.5% each quarter and the initial amount vests on the business day immediately on which each of the optionees is elected or appointed as a director of the Company. In the event they are not elected as a director, all options granted expire immediately.
- (v) A summary of the status of the stock option plan and changes during the period is as follows:

	Number of Options Outstanding	Weighted Average Exercise Price
Balance September 30, 2009	3,984,000	\$ 0.25
Options granted	1,820,000	\$0.60

Type B	January 27, 2015	\$0.55	\$0.60	100,000	4.83
				5,534,000	

Stock options granted are expensed as share-based payments. The Company uses the Black-Scholes option pricing model to value stock options granted. The model requires management to make assumptions, which are subjective and may not be representative of actual results. Changes in assumptions can materially affect estimates of fair values. The following assumptions were used for the options granted January 27, 2010:

Risk-free interest rate	2.46%
Expected life	5 years
Expected stock price volatility	175%
Expected dividend yield	0.00%

The options issued January 27, 2010 have various vesting provisions over the next three years.

(d) Share purchase warrants

As at March 31, 2010 the Company has share purchase warrants outstanding entitling the holders to acquire common shares as follows:

Issue Date	Expiry Date	Grant Date Fair Value	Exercise Price	Number of Warrants	Weighted Average Exercise Price
Balance, March 31, 2010 and December 31, 2009				4,500,770	\$ 0.47

8. Subsequent events

- a) In April 2010, the Company announced that it had signed a binding conditional Letter Of Intent ("LOI") with Coalbed Gas Hachula Ltd. ("CGH") an Israel-based Coalbed Methane Development company to farm-in to 70% in its "Notera" Petroleum License No. 355 ("Notera"). Notera is approximately 19,000 acres and contiguous and directly to the south of the Company's Eitan Petroleum License No. 356 ("Eitan") in the Hula Valley of northern Israel. Prior drilling and evaluation of Notera indicates a similar geologic profile and hydrocarbon development potential as Eitan, which is held 100% by the Company.
